11	Zee Music Company	96700000
12	WWE	96000000
13	Gaming	93600000

Project Overview & Objective

The **YouTube Global Analytics Dashboard** is an interactive Business Intelligence solution built in Microsoft Power BI to analyze worldwide YouTube channel performance. It transforms raw statistical data into meaningful business insights through dynamic filtering and data-driven storytelling

Multi - Page BI Dashboard

Interactive report pages covering subscriber, earnings, and category analysis

Dataset: Cleaned_YouTube_Stats

Includes ranking, youtubers, subscribers, countries, views, uploads, channel names, earnings

Technical Stack & Data Operations

Microsoft Excel Data Preparation

Used for raw dataset inspection, data validation, preliminary formatting, duplicate identification, and missing value detection before loading into Power BI

Microsoft Power BI Desktop Platform

Primary tool for the full BI lifecycle: ETL (Extract, Transform & Load), data modeling, DAX calculations, dashboard development, and interactive reporting

Subscriber Demographics & Trends

Subscribers by Country

Categories

Music and **Entertainment** each contribute approximately **22%** of total subscribers, the dominant content categories globally

Geographic Analysis

The **United States** leads in subscriber base, with **India** ranking second. Brazil, the United Kingdom, and Mexico round out the top markets for successful YouTube creators.

Highest yearly earnings by category

Historical Trends

Channels established around **2006** and **2014** show significant subscriber growth. Earlier channel creation strongly correlates with higher long-term accumulation, highlighting the competitive advantage of early platform adoption

Dashboard Mechanics

Used a strategic mix of standard charts and advanced custom visuals for maximum analytical depth

The **Area Chart** reveals that channels established during YouTube's early growth phase continue to generate the highest annual earnings today, reinforcing the long-term value of early adoption
